

The expertise and capacity to manage all facets of your project.

Merit Consultants International works on behalf of Clients worldwide delivering Project and Construction Management services to the mining sector. With over 30 years of hands-on experience from studies through commissioning, the Merit team has the knowledge, expertise and capacity to manage all facets of your project development needs.

Integrated Team Philosophy

We act as an extension of your development team or as an independent construction management group working in conjunction with the selected engineering group. Merit is mandated to continue in an independent manner, keeping the scope of a project in your, the Owner's control.

Merit contributes to and manages all levels of pre-development studies, authors due diligence reports, acts on behalf of independent banks, provides study reviews and guidance on project development and executes construction management in an integrated team environment. We can assist with the selection and

coordination of resources best suited to a particular project, or operate as a stand alone group.

*We act as an extension of
your development team or as
an independent Construction
Management group*

Time Proven Processes and Methodology

Merit has developed an extensive database and baselines on industry project costs and statistics related to engineering and construction. We have a full suite of project procedures, policies and supporting construction execution documents. Using these tools with our network of contacts in the industry Merit is able to support Clients in the development of project feasibility studies, estimating, logistics, planning, selection of resources and execution of the work. In addition Merit supplies services for the selection and inspection of equipment, risk analysis and expert advice on matters related to project development.

One Point Accountability

On specific projects one point accountability can improve project schedule and capital costs. On these projects Merit, with the Cementation Group, offers a turn-key Best for Project service for above and below ground mining projects.

The Merit Advantage

The Merit advantage brings the expertise and resources required to manage your project on schedule and control your costs.

- Long term global project and construction management experience
- Focus on a construction driven based schedule
- Involvement and input into pre-construction activities with a view to improving project schedules, costs and execution
- Experienced site staff provide practical constructability review and interface with the Owner's consultants to mitigate schedule delays and cost overruns
- Timely and straight forward reporting

A better way to deliver capital projects.
