

FORT KNOX

Project & Construction Management Services provided by Merit Consultants International 2008-2013

Kinross Gold's Fort Knox Mine near Fairbanks is an open pit with carbon-in-column, heap leach and gravity processing.

Merit provided CM services for the Heap Leach Stage 1 to 3, Tailings Storage Facility Stage 1 and 2, ALPM Shop, CIC Building with Rack and Bridge Piping, Pipelines, and Power Lines for Heap Leach and Phase 7. The Main Access Road was relocated to accommodate Heap Leach Stage 1 to 3. Merit provided on site construction management, cost support, scheduling, purchasing and contract services.
