

RED LAKE MINE

Project & Construction Management Services provided by Merit Consultants International 2003-2007

RED LAKE, ONTARIO

Goldcorp's Mine Expansion & Shaft Project included the construction of the 6,314' McEwen Shaft, retrofit and upgrade of the existing mill to 1,200 tpd, a new shop and office facility, water treatment plant and material handling interface for increasing mill throughput.

Merit provided Project and Construction Management services for the above ground facilities and shaft.
