

TWIN METALS MINNESOTA

Feasibility Study Services provided by Merit Consultants International 2016-2018

BABBIT, MINNESOTA

Twin Metals Minnesota LLC is a mining company focused on developing and operating an underground copper, nickel, platinum, palladium, gold and silver mining project in northeast Minnesota within the Duluth Complex, the world's largest known undeveloped deposit of copper, nickel and strategic metals. Merit worked with TMM to further improve and refine the PFS level conceptual mine plan by providing Capital Cost Estimate and Trade-Off Studies.
