

WHITE MOUNTAIN PROJECT

Site Construction Supervision Services provided by Merit Consultants International 2017—2018

GREENLAND

Hudson Resources Inc. is a Canadian based mining and technology company focused on developing the unique White Mountain (Qaqortorsuaq) anorthosite (calcium feldspar) mine in Greenland to bring green products to the world. GreenSpar and Anocrete have applications in the fiberglass, alumina, filler, paint and white cement markets. The mine adheres to the strictest environmental standards and does not use any chemicals or water for processing. Construction is underway and the mine will be in production in the second half of 2018. Merit is providing site supervision during the construction phase.
